

IN THE SPECIFICATION

Please insert on page 1 before "BACKGROUND OF THE INVENTION" the following paragraph:

This application is a continuation of U.S. Application No. 08/834,060 filed on April 11, 1997, now U.S. Patent No. 6,360,244 issued on March 19, 2002, and claims priority therefrom pursuant to 35 U.S.C. §120.

Please replace the last paragraph on page 14 with the following:

Similarly, while the user process 206 context, the user code 214 is executing and does not have visibility into either the level II domain code and data 210 or the level I domain code and data 212, which the user code 214 respectively only sees as the first reserved area 216 and the second reserved area 218. Since these areas 216 and 218 are perceived as reserved by the user code 214, the level II domain code and data 210 residing in the first reserved area 216 and the level I domain code and data 212 residing in the second reserved area 218 are protected from the user code 214. The user process 206 context thus enables the user code and data 214 to operate at a fourth level of protection.
